

Hello, I'm Cherednichenko Daniil. I'm interested in Python Trainee vacancy of DataArt. At that moment I'm the second year student of Physics Faculty, Voronezh State University.

I have spent the last two years improving my skills as a Python Backend developer. I have learnt a lot from my current role but now I'm looking for a new challenge to broaden my horizons and to gain a new skill set.

(Либо это продолжение, если дает продолжить) As for my hobbies...

(если нет, и спрашивает про хобби - то) I really like...

As for my hobbies... I really like chess, I try myself in writing music, i like play basketball(I love outdoor sports).

chess

I can play chess for hours, I crazy about with chess etudes and beautiful combinations. Literally every day I solve chess puzzles, I try not to lose my form (as with programming). I even played with the grandmaster somehow, but failed to win.

music

well, I really love music and what a state of euphoria it can send. Recently I decided for myself that I want to try myself as a music composer (I train in creating music in the wave genre, EDM) I even have a small dream. I plan to release my album on Spotify and other sites.

basketball

I fell in love with basketball early on because it's just so damn fun. I love that basketball is dynamic, engaging and fast-paced. That's game only and only for team. You can get success if you play like a team, together, with great game plan.

And there is nothing like the peak experiences. The moments of flow when you can't miss. The feeling when the buzzer sounds after a huge win and you share tired hugs with some of your closest friends.

И темы которые еще могут быть))))):

Weather

I can say the weather is good. It's sunny and windy today. It looks like it's not going to rain.

Inspiration

I feel inspired by Andrey Doronichev. He is Director of Product in Google. He lives in Silicon Valley, California.

He is from simple moscow family. He's story of success has been started in small city near Moscow. He just made several projects, startups, and suddenly understood that he has very unique knowlegies. Andrey sent his CV to GOOGLE and 4 months later he get GOOGLE's answer. Young Product Manager started in Dublin, then he arrived to London and in late 2009 he came to Mobile Team in California. He was so confident in mobile future of web players. And it had

happened... Mobile version of youtube grew to the biggest online streaming platform in the whole world. That's story shows us how he grew from an ordinary Moscow programmer student to a Director of Product in Google.

Vacation

I like spending my holidays in active way. My favorite time for the vacation is summer because it's warm and sunny.

I really like mountains. I always try to spend my vacation in the home region, and always try to go to the mountains. As they say(как говорится) you can endlessly look at three things: at fire, at water and at mountains. Mountains give you calm, beautiful landscapes and fresh air that smells like something sweet.

travelling

I have never been abroad. But I was in every part of Northern Caucasus. That's my home area. I was born there. That's very unique area with mountains, mineral water and the highest Vulkan in the whole Europe and Russia.

This region gives each man marvelous emotions. And this emotions you can get again and again when you came to the Caucasus.

dataart

DataArt is a international software engineering company where I can improve my development and soft skills. DataArt's internal culture is based on trust, respect, and relationship quality. As I know it's called "People-first culture".

I share values and principles of the company. That is why I would like to be a part of the team.

subject

My favourite subject in university is programming. Throughout the semester, our professor gave lectures in a very interesting and understandable way. He gave the most important examples, methods, algorithms, patterns in programming and told us how solve real-world problems in coding.

He always open to answer any students' questions. He's lectures isn't boring.

english

I studied English at school and university. And now i am improving my English by watching TV series and reading books and articles in English. (написать про то что все устройства у меня на английском языке)

series and films

I like films based on true stories that immortalize real-life moments, memories.

One of my favorites is Papillon. That's film is about french safecracker from the Parisian underworld who is framed for murder and condemned to life in the notorious penal colony on Devil's Island.

What about TV series.... I really crazy about Peaky Blinders. Set in Birmingham, England, the series follows the exploits of the Shelby crime family in the direct aftermath of the First World

War. The fictional family is loosely based on a real urban youth gang of the same name, who were active in the city from the 1890s to the early 20th century.

coronavirus

I'm working from the office. I wash my hands, don't touch face, wear a mask, keep the distance and reduce social contacts. I go out for a walk in the city, but try to avoid crowded places. The peak of the coronavirus epidemic has been passed in Russia. Quarantine restrictions are loosening in most cities. Restaurants, cinemas, schools and universities are open again. I think, social distancing and self-isolation were effective ways to slow the spread of Covid-19. When i was working from home I could devote more time to my hobbies.

developing

I'm programming in Python and enjoy solving challenging tasks and always learn something new. This language allows me developing programs faster. Python has a rich community providing a large set a tools and libraries.(написать про бэкенд)

questions

As for books. I think this is a great way to get away from everyday troubles and let your imagination run free.

Do you like fantasy books? What do you think about it? Or do you prefer TV series?

Do you prefer active lifestyle?

My thesis was in developing an intelligent user interface that is adapted to user criteria.

I prefer working from home because I can devote more time to my hobbies.

I noticed that many children are interested in reading or listening to fairy tales. And then, as they got older, fantasy became a place to escape the hustle and bustle of real life and becaptured by a story which involves something special and unreal - possibly magic.

I'd describe myself as a goal-oriented and hardworking person.
